AI PromptMaster · 2026

Yaxshi prompt qanday yoziladi

1. Rol bering. «Sen tajribali marketologsan» deb boshlash javob sifatini oshiradi.

2. Kontekst bering. Biznesingiz, mijozingiz, narx, shahar: qancha aniq bo'lsa, javob shuncha foydali.

3. Natija formatini ayting. Jadval, ro'yxat, 3 variant, 500 belgigacha va h.k.

4. Cheklov qo'ying. «Yolg'on raqam yozma», «bosimsiz», «oddiy tilda».

5. Davom ettiring. Birinchi javob ideal bo'lmasa: «qisqaroq qil», «2-variantni rivojlantir» deb so'rang.

6. Tekshiring. AI xato qilishi mumkin: raqamlar, faktlar, qonunlar va narxlarni rasmiy manbadan tekshiring.

Promptlar inglizcha qoldirilgan: AI inglizcha ko'rsatmani aniqroq tushunadi. Oxiridagi «Reply in Uzbek (Latin script)» qatori javobni o'zbekcha qiladi. [ ] ichini o'zingiznikiga almashtiring (o'zbekcha yozsangiz ham bo'ladi).
